KEES VAN DER WESTEN

Kees van der Westen espresso machines are true design icons, handcrafted in the Netherlands. Combining striking aesthetics with uncompromising engineering, each machine is built to deliver exceptional performance, durability and character, making a bold statement in any coffee bar.

Kees van der Westen focuses on innovation, quality and usability. Design and details are everything. Each model is meticulously finished, built to last and unmistakably recognizable - transforming the espresso machine into the centerpiece of the bar.

From the well-known Spirit to the legendary Speedster, Kees van der Westen machines are engineered for absolute control and stability. Advanced boiler systems, precise temperature management and robust components ensure consistent extractions and outstanding cup quality, even in demanding professional environments.

The prices listed above are starting prices and may vary depending on the selected configuration and options.
All prices are EXW Waarle (NL-BE).

PERFECT MOOSE

Perfect Moose is the first smart steamer which turns any milk or plant-based alternative into perfect microfoam without touching a single button. No room for error, no extensive training, next to zero cleaning and loads of fun.

Manual milk steaming is a time-consuming and complex process that many coffee shops and businesses struggle with on a daily basis. Repeated training takes time, effort and money, resulting in inconsistent results.

By automating milk steaming, baristas gain back what matters most: time for creativity, service and genuine connection with customers.

Perfect Moose does not allow milk to pass through the machine. Instead, the milk is steamed directly in the pitcher* when placed on the machine. Perfect Moose precisely monitors the milk's temperature throughout the entire steaming cycle.

*Perfect Moose always works with dedicated pitchers. They come in different colors and sizes.

MADE IN BELGIUM

Perfect Moose Greg

Connect to an espresso machine
Constant pressure between 1.3 - 1.4 bar
Minimum power of 2400W
Incl. free set of pitchers (3x50cl)

ditting

Ditting is globally respected for its expertise in precision grinding, setting the benchmark for filter coffee and retail grinding.

Ditting grinders are designed to deliver highly uniform grind particles while preserving the coffee's natural aromas and flavors. Their precision burrs, robust construction and controlled grinding process ensure consistent results, batch after batch - ideal for filter coffee, retail grinding and cupping applications.

Built to perform day in, day out. High throughput, durability and intuitive operation make them a dependable choice for busy professional settings where accuracy and efficiency matter most.

By prioritizing grind uniformity and minimal heat generation, Ditting allows the true character of the coffee to shine through. The result is exceptional flavor clarity, repeatability and a clean, balanced extraction - making Ditting a trusted reference for coffee professionals worldwide.

MAHLKÖNIG

THE KING OF GRINDERS

Mahlkönig is globally renowned for crafting the most precise and reliable coffee grinders, trusted from busy cafés to specialty coffee bars and high-end home setups.

Espresso excellence
The E65 and E80 series combine power, speed and accuracy. With innovative Grind-by-Time, Grind-by-Weight and Grind-by-Sync technologies, they deliver perfectly consistent doses, reduce waste and support a seamless workflow even during peak service.

The benchmark in versatility
The iconic EK43 has reshaped the specialty coffee landscape. Known for its unparalleled particle uniformity, it unlocks maximum flavor clarity across every brew method. The EK Omnia elevates this legacy with a modern, digitally refined evolution of the EK platform.

For the passionate home barista
Mahlkönig brings its professional heritage into the home segment with compact, powerful all-round grinders. It even includes an espresso grinder with Sync capabilities.

puq
Master your craft.

Designed as a standalone model or to seamlessly fit under a specific grinder for the perfect setup for grinding and tamping, without offering any counterspace.

PUQ tools streamline the barista workflow by increasing consistency and speed while reducing the physical strain of manual tamping.

PUQpress models deliver fast, fully automated tamping with precision pressure control that ensures a level, repeatable tamp every single time. This boosts consistency, reduces channeling and significantly improves extraction quality. With identical pressure, angle and finish on every shot, PUQpress not only elevates cup quality but also eliminates the effort and strain associated with manual tamping.

Designed as stand-alone units or as grinder-specific under-counter models, PUQpress fits seamlessly into any setup - creating the perfect workflow for grinding and tamping.

PUQpress Mini

Standalone model
Capacity: up to 7 kg of coffee per week
